

Dod Rocket Class Better Secondary Wpn v2_0

Wilson [29th ID] <https://forums.alliedmods.net/member.php?u=7962>

Description

Replaces the secondary weapon with a main gun (like dods) when you select a Rocket class.

To install

the download has all the files in the "addons" folder,

- install those and
- enable the plugin put... `dod_rocketclass.amxx` ... in your `addons\amxmodx\configs\plugins.ini` file
- Requires these modules... `amxmodx`, `amxmisc`, `dodfun`, `dodx`, `fakemeta`, `hamsandwich`
- Start the server and it will work.

Tested on the latest metamod amx mod x files...still works in 2026.

The post on that site...

Dod Rocket Class

This plugin gives the Bazooka class an M1 Carbine instead of a Colt

This plugin gives the Panzerjaeger class an MP40 instead of a Luger

This plugin gives the Piat class a Sten instead of a Webley

The idea was taken from DOD:Source - why shouldn't 1.3 have it too?

Now these classes can be used effectively and do quite some damage.

We have people in my servers who only use this class because it's actually useful now.

This plugin replaces [Dod Technician](#), but is technically a totally different plugin as the code is 100% different and more efficient. If you look at the SMA, there are only 3 functions and a few stocks in this plugin. Much more concise than the "rigged" method of Dod Technician. This plugin actually gives you the secondary weapon and sets it to your secondary slot. Quickswitching works..scrolling works..etc. It's "foolproof"

This would not have been possible without Sawce's hamsandwich module.

Only Known Bugs

-As of now, if you drop one of your weapons, you cannot pick it back up. I could code it so that you could, but that will simply increase the chances of server crashes. Better to leave it like this - how often do you drop your weapon anyway?

-When you die, you drop your secondary instead of your primary (rocket). Not sure how to fix this but who cares.

Usage

Just select the Bazooka/Panzerjaeger/Piat class. Scroll through your weapons and you'll see it.

Sorry it took so long to come out.
